

## UK HealthCare welcomes a new elbow and shoulder specialist.

Dr. Kamineni received his medical degree from the University of Wales College of Medicine in Great Britain. He completed an anatomy demonstratorship at Oxford University, general surgical training in Cambridge and an orthopaedic residency in London, England. He also completed a shoulder fellowship at the University Hospital Balgrist in Switzerland and an elbow fellowship at the Mayo Clinic.

Extensive training, years of expertise and a wide range of orthopaedic skills allow Dr. Kamineni to focus on the entire upper limb area, rather than one smaller area such as shoulders or elbows. This allows an integrated approach to solving upper-limb problems.

Welcome Srinath Kamineni, MD

UKHealthCare®

## Clinical interests

### Elbow:

- Elbow instability (dislocations, fracture dislocations and recurrent instability)
- Stiff elbow (soft-tissue and bony)
- Radial-head fractures (fixation, reconstruction and replacement)
- Tennis and golfer's elbow (nonoperative and arthroscopic management)
- Elbow arthritis (rheumatoid, osteo- and post-traumatic; arthroscopic recontouring, hemiarthroplasty, total elbow replacement and revision elbow arthroplasty)
- Biceps/triceps ruptures
- Sports injuries of elbow
- Osteochondritis dissecans (OCD)

### Forearm:

- Essex-lopresti injuries
- Forearm rotational stiffness management

### Shoulder:

- Shoulder reconstruction, both arthroscopic and open
- Shoulder arthritis (rheumatoid, osteo- and post-traumatic), including the whole spectrum from nonarthroplasty replacement, resurfacing and reverse arthroplasty
- Acromioclavicular and sternoclavicular joint injuries/instability including arthroscopic stabilization
- Rotator cuff tears and arthropathy
- Unstable shoulders (primary and revision stabilization)
- Proximal humeral fractures
